

It writes, rates, creates, even telecommunicates. Costs less, does more- the Commodore 64.

When
Commodore
introduced
the 64,
the industry
suddenly

realized that
there would be a

computer in every home,
school and business years before anyone
ever dreamed.

That's because Commodore 64 halved
the price of high technology: while
you can compare
the 64's capabilities
with those of any
sophisticated business
PC, you can com-
pare its price with
that of an average television.

What can you do with it? Create with

its high resolution
Sprite Graphics.
Add a printer and
type with it. Add
a disk drive to use

spread sheets and other financial

programs. Learn and
play music through
your home sound sys-
tem on the 64's

professional quality music synthesizer.

Add a modem, and hook up with
the vast computer networks through
your telephone. In short, the
Commodore 64
is the ultimate
personal computer,
at a price
you can afford.
